VOX STELLARUM: OR, A LOYAL ALMANACK

For the Year of HUMAN REDEMPTION

1796,

Being the BISSEXTILE, or LEAP-YEAR.

In which are contained

All THINGS fitting for such a WORK; as,

TABLE of TERMS and their RETURNS;

46-6-24-119

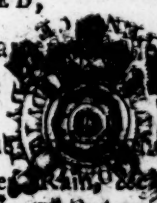

The Full, Changes, and Quarters of the MOON;
Rising, Southing, and Setting of the SEVEN STARS;
and other Fixed Stars of Note; the MOON's Age, and

A TIDE TABLE fitted to the same;

Rising and Setting of the SUN; the Rising, Southing,
and Setting of the MOON; Mutual Aspects, Monthly
Observations; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

Astronomical Observations on the Four Quarters of the Year;
remarkable CHRONOLOGY; the

and other MATTERS, both curious and profitable.

With further Observations on the Weather;
and an HIEROGLYPHIC adapted to the TIMES.

By FRANCIS MOORE, Physician.

L O N D O N,

Printed for the COMPANY of STATIONERS, 1796;
and Sold by ROBERT HORSFIELD, at their Hall in
LUDGATE STREET. [Price Eleven Pence, stitched.]

2 JANUARY XXXI Days.

Let my Muse rouse, and tell what News she hears
 Amongst the Stars, and Motions of the Spheres;
 Speak out and fear not, be it good or bad;
 If't doth affront the Turk, or make the Papist mad—
 But now, behold, I'm interrupted here,
 And bid for some unwelcome News prepare.

Monthly Observations.

Rain fallen in Jan. 1794, at Lon-
LAST Quart. 2 day, at 1 morn.
 don, was 0,4 Inches.

Rain or Snow (the Quantity more or
 less) may be expected about the 9th,
 24th, 27th, and 31st Days of this Month;
 the Day before or the Day after; that
 is, within the short Space of three Days.

NEW Moon 10 day, at 6 morn.

Courteous Reader,

I have as usual presented you with
 the Depth of Rain at London. It is
 what fell in the Year 1794, taken at
 Somerset House, by a very accurate

FIRST Quart. 17 day, at 5 aftern.

RAIN GAGE, which is placed nearly
 about the Tops of the Chimnies of
 the House. The Quantity put down is
 what it was for each Month, and taken
 in Inches and decimal Parts of an Inch;
 and is the Depth the Rain-water would

FULL Moon 24 day, at 10 morn.

have been had it stagnated on an even
 Surface upon the Earth, without being
 imbibed by the Earth, or lessened by
 Evaporation. By summing up the
 Numbers of each of the Months, the
 whole Year's Depth was 18,463 Inches

LAST Quart. 31 Day, at 9 night

My Muse being more inclin'd to sigh than sing,
 May she with Olive-branch glad Tidings bring,
 For our late Discords, and unhappy Days,
 And to JEHOVAH's Name give Laud and Praise;
 Raise drooping Spirits, and proclaim a Peace;
 Remove the Cause, and the Effects will cease.

VENUS will be a Evening Star till August 5; then a Morning Star for the rest of the Year.

This Month begins with windy stormy Air,
 First Frost, then Sleet or Snow; the Middle clear,
 With Morning Frost, but not continuing;
 Then warmer Rain to usher in the Spring:
 Nor yet at last is any settled Air,
 But rather windy, Planets do declare.

10 MAY XXXI Days.

The Crisis of distemper'd States advance,
And soon we hear of tragic Acts of Fate;
Some News arrives from Italy and France,
And many live towards their latest Date.
The German Princes murmur, and prepare,
In several Parts, to affront the holy Chair.

Rain fallen in May, 1794, at London,
 was 2,215 Inches.

Rain (more or less) may be expected
 about the 6th, 21st, and 28th Days
 of this Month; the Day before or the
 Day after.

NEW Moon 7 day, at 9 morn.

ment, and begin to be ———; the Officers do so too; in short, all the Symptoms, which have ever been met with in History, previous to great

FIRST Quart, 13 day, at 12 night.

Changes and Revolutions in Govern-
 ment, have been daily encreasing in
 France for some Years. They be-
 gan to exist, says Lord *Chesterfield*,
 in one of his Letters, in the Year
 1753.

FULL Moon 21 day, at 7 aftern.

Great Endeavours are now used to
 settle a better Understanding amongst
 some neighbouring Princes and re-
 publican Governments; and various
 Schemes and Projects are contrived
 by

LAST Quart, 29 day, at 10 night.

Bold *Mars* has been conjoin'd with *Mercury*;
 An active Month and active Times you'll see;
Saturn and *Mars* oppose before the End;
 When will the Stars their better Influence send?
 Howe'er, I'll pray that ENGLAND may be free
 From Famine, War, and dire Mortality.

The

18 SEPTEMBER XXX Days.

This Month, infested with a hateful Square,
Some Danger to the Mitre doth declare;
To Trouble and Confusion it doth tend,
It makes some Cedars fall that would not bend.
Now sad Disorders and tumultuous Spoil
Attend the poor and barren Spanish Soil.

vive and flourish amongst our British Merchants and Tradesmen, to the great Joy and Satisfaction of every good Englishman.

Matters

The Stars intill their heavenly Influences
 On all Mankind, Peasants as well as Princes;
 And when we are with Grief and Labour vex'd,
 Our Hearts grown dull, with Sorrow much perplex'd,
 'Tis then our Duty to submit to Fate,
 And be contented with our sad Estate.

from

Who list to view the Motions of the Sky,
Will find some Planets are at Enmity,
From which we may expect oft changing Air,
High Words, and sometimes Blows, they do declare;
Sharp Winds, with Frost and Snow, and Rain together,
Disturbed Times, and quite unconstant Weather.

gunt

If we consider that the Year runs round,
 And by the Planet's Aspects, Truth hath found
 Its good Things, bad Things, Things indifferent,
 'Tis that I look'd for, and was my Intent.
 I cannot please all, if I please my Friend
 I've hit the Mark; so well the Year will end.

The Dominion of the Moon in Man's Body,
Passing under the Twelve Zodiacal Constellations.

♈ <i>Aries</i> Head and Face	♎ <i>Libra</i> Reins and Loins
♉ <i>Taurus</i> Neck and Throat	♏ <i>Scorpio</i> secret Members
♊ <i>Gemini</i> Arms and Shoulders	♐ <i>Sagittary</i> Hips & Thighs
♋ <i>Cancer</i> Breast and Stomach	♑ <i>Capricorn</i> Knees & Hams
♌ <i>Leo</i> Heart and Back	♒ <i>Aquarius</i> Legs & Ancles
♍ <i>Virgo</i> Bowels and Belly	♓ <i>Pisces</i> Feet and Toes.

The Names and Characters of the PLANETS,
With *Dragon's Head* and *Tail*.

♄ Saturn	} ☉, or the Sun }	♀ Venus
♃ Jupiter		☿ Mercury
♂ Mars		☾ the Moon

♈ Dragon's Head.—♏ Dragon's Tail.

The CHARACTERS of the ASPECTS.

♌ Conjunction	} ☿ Opposition	Δ Trine
* Sextile		□ Quartile

Upon the TWELVE SIGNS.

- ♈ The Head and Face the *Ram* doth always rule :
 ♉ The Neck and Throat are govern'd by the *Bull*.
 ♊ O'er the Arms and Shoulders still the *Twins* preside :
 ♋ Breast, Stomach, Ribs, the crooked *Crab* doth guide.
 ♌ The noble *Lion* rules the Back and Heart :
 ♍ The bashful *Virgin* claims the Belly Part.
 ♎ The Reins and Loins the equal *Balance* weigh :
 ♏ The *Scorpion* o'er the Secret Parts doth sway.
 ♐ The curious *Archer* doth the Thighs affect :
 ♑ So doth the *Goat* our bended Knees protect.
 ♒ The Legs unto *Aquarius*' Lot do fall :
 ♓ The *Fish* our active Feet their Portion call.

A plain and easy TABLE, shewing the Time of HIGH WATER.

NOTE, That the Moon's Age being taken notice of in the TABLE, you have the Time of HIGH WATER at all the under-named Places.

Queenborough, Portsmouth, Southampton, Kentish Knock, Leith, Beachy, Isle of Wight, Dunkirk, Canadade, Coast of Flanders, at the Spits and Dover Pier.

Gravelend, Downs, Blacknefs, Romney, Thanet, Scilly Half-tide, North-Cape before Cocquit, and between Calais and Dover.

London, Tinemouth, Hartlepool, Amsterdam, Whitby, Dort, Gafcoin, West of Ireland, at Groin, at Rotterdam, and in Robin Hood's Bay.

Newcastle, Humber, Falmouth, Severn-mouth, at the Spurn between Scilly and Lizard, Ramfey, Dartmouth, Guernsey, Torbay, St. Maloe's.

Plymouth, Antwerp, Hull, St. David's, Holms of Bristol, Lundy, St. Pauls, Salcom without Ufiant, at Waterford, Boston, and at Lynn Half-tide.

Bristol-Key, Weymouth-Key, Aldborough, Foulness, Lims, the Start before St. Nicholas, Sedmouth in the Channel, between Foy and Falmouth.

Yarmouth-Road, Harwich, Calais-Road, Dover, Cowes, Caen, the Frith, South-Forland, St. Helen's, Coast of Normandy and Picardy.

Hague, Peter-Port, Dublin, between Beachy and the Isle of Wight, Yarmouth, St. Magnus's Sound, Combay, without the Caskets in the Channels.

How to let a Clock or Watch by this Table. For example, Jan. the 1st, I find, by looking into the Table, that a Clock to be right must be 4 Minutes 0 Seconds faster than a Sun Dial; therefore I set it so much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or Watch by a Dial.

Note. A Sun Dial shews Solar or Apparent Time; but a Clock, &c. should be set to Equal or Mean Time, as the Table directs, to go true.

30 L A W T E R M S, &c.

A TABLE of Terms and Returns for the Year 1796.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns, or Effoign Days.		Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	- Jan. 20	21	22	23	Saturday
In fifteen Days of St. Hilary	- 27	28	29	30	Saturday
On the Mor. of the Purif. of the B ^y . V. M.	Feb. 3	4	5	6	Saturday
In eight Days of the Purif. of the B ^y . V. M.	9	10	11	12	Friday

Easter Term begins April 13, ends May 9.

In fifteen Days after Easter	- April 10	11	12	13	Wednesd.
From Easter Day in three Weeks	- 17	18	19	20	Wednesd.
From Easter Day in one Month	- 24	25	26	27	Wednesd.
From Easter Day in five Weeks	- May 1	2	3	4	Wednesd.
On the Mor. of the Ascen. of the Lord	6	7	8	9	Monday

Trinity Term begins May 27, ends June 15.

On the Morrow of the Holy Trinity	May 23	24	25	27	Friday
In eight Days of the Holy Trinity	- 29	30	31	J. 1	Wednesd.
In fifteen Days of the Holy Trinity	June 5	6	7	8	Wednesd.
From the Day of Holy Trinity in 3 Weeks	12	13	14	15	Wednesd.

TABLE of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt.	Mag.	Names of the Stars.	Rise		South		Sets	
				h	m	h	m	h	m
♂	53	1	Aldebaran, or Bull's Eye	1	a 34	o	a 48	o	b o
♂	29	1	Left Foot of Orion	4	31	1	31	1	34
♂	36	2	Middle * in Orion's Belt	4	13	1	51	o	35
♂	45	1	Right Shoulder of Orion	3	23	2	8	o	8
♂	21	1	Syrius, the great Dog	6	41	3	1	o	48
♂	43	2	Procyon, the little Dog	5	33	3	53	2	a 7
♂	30	1	Heart of Hydra	8	39	5	47	2	44
♂	51	1	Regulus, Lion's Heart	7	26	6	21	5	16
♂	54	1	The Lion's Tail, Denab	8	44	7	54	7	7
♂	28	1	Virgin's Spike	12	46	9	38	6	36
♂	58	1	Arcturus	10	47	10	30	10	12
♂	12	1	Antares, the Scorp. Heart	17	36	12	39	7	42
♂	46	2	Bright * of the Vulture	17	38	16	3	9	b 27
♂	6	1	Fomelhaut	11	14	19	11	10	37
♂	56	2	Head of Andromeda	10	42	10	10	2	56

THE brightest of the seven stars is of the third magnitude, and hath 61 degrees of meridian altitude, and in colour participates of the D and ♂.

The fixed stars all rise South, and set about four minutes sooner every night than they did the night before; this considered, the exact time of rising, Southing and setting, for any intermediate night, not herein noted, may be very easily deduced from these Tables, by inspection only.

To know the time of rising, Southing and setting of any star in this table, for any day required, it is but considering how many hours and minutes that star rises, Souths or sets, either before or after the seven stars on that day, and you will have your desire; observing that in this Table, a stands for *after*, and b for *before*.

Upon the ECLIPSES of the SUN and MOON, and
other Celestial Phenomena, in the Year 1796,

*Calculated from New Astronomical TABLES, founded
on the Newtonian Theory of Gravitation,*

By HENRY ANDREWS, of Royston, Hertfordshire. *

WITHIN the Course of this Year, the two bright
Lamps of Heaven will be Four Times eclipsed to
one Part or other of this Terraqueous Globe; but to the
Inhabitants of *Great Britain*, not one of these Eclipses will
be visible. They happen in the following Order:

The First is an Eclipse of the SUN, and happens on
Sunday the 10th of *January*, at 5 Min. past our 6 in the
Morning; consequently, invisible both to these Kingdoms
and to all the Northern Parts of the Globe; but in the
Southern Regions it will be a very great Eclipse, for in 21
Deg. of South Latitude, and 88 Deg. 45 Min. of East
Longitude from *London*, the Eclipse will be central in the
Meridian; in which Place, and divers others along the
Track of its central Appearance, the Breadth of the Annu-
lus will be nearly half a Digit on all Sides; a very beautiful
Phenomenon for the Inhabitants of those Parts to behold,
if any such Inhabitants there be. This Eclipse will be vi-
sible (either more or less) to the Western Parts of *New Hol-
land*, and to all those small Islands that lie scattered in the
Indian or Eastern Ocean, to the Eastward of the Island of
Madagascar.

The Second is another solar Eclipse, but invisible to us;
it happens on *Monday*, the 4th of *July*, at 1 Min. past our
11 o'Clock at Night; at which Time this Eclipse is both
Central and Total in the Meridian, about 164 Deg. 45 Min.
West from *London*, under 36 Deg. 44 Min. of North La-
titude;

* All such as write to him upon their own Business, especially
concerning Points of Curiosity, are desired to pay the Postage of
their Letters, if they expect any Answer.

itude; consequently, at the *Sandwich* Islands, the *Ladrone* Islands, and the Islands of *Japan*, this will be a large visible Eclipse; for along the Track of central Appearance, the Inhabitants, if ignorant of Astronomy, will doubtless be under no small Surprize at the sudden Disappearance of the *Sun*, involving them in a Kind of Midnight Darkness even at Noon Day.

The Third is a partial Eclipse of the MOON, upon *Wednesday*, the 14th of *December*, but invisible to us; for with respect to *London*, our Metropolis, the Eclipse begins at 9 Min. past 1 in the Afternoon; the middle (or Time of the greatest Obscuration) happens 21 Min. past 2, and the Eclipse will be quite over at 34 Min. past 3; but the *Sun* sets not that Night at *London* till 54 Min. past 3; and seeing the *Moon* cannot rise above a Minute or Two before the *Sun* sets, this Eclipse cannot be seen in our Hemisphere: At the Time of the greatest Obscuration, the *Moon* will be vertical to such Persons as happen at that Time to be sailing near some of the *Ladrone* Islands, in Latitude 22 Deg. 31 Min. North, 144 Deg. 51 Min. East from *London*; consequently, this Eclipse will be visible to most of the small Islands dispersed in the great Pacific Ocean, such as the *Sandwich* Isles, the *Society* and *Friendly* Isles, the *New Hebrides*, *New Zealand*, *Van Diemen's Land*; *New Holland*, and all along the East Coast thereof, called new *South Wales*, on which Coast are Botany Bay and Port Jackson; the Isles of *Sunda*, *Borneo*, the *Philippines*, *Japan*, and the whole Continent of *Asia*; the Beginning will be visible as far as the Western Coast of the American Continent, and the End will extend itself into *Poland*, *Sweden*, *Norway*, and *Denmark*, and as far as our Neighbours the *Germans* and *Dutch*. The *Moon* rises eclipsed at the *Orkney* Islands on the North of *Scotland*.

The fourth and last is an invisible Eclipse of the SUN, on *Thursday*, *December* the 29th, at 59 Min. past our 5 o'Clock in the Morning; in the great Southern Ocean this will be a very great Eclipse, not total, but Annular; the Breadth of the Annulus, in the central Path, will be about half a Digit on all Sides: This Phenomenon happens in the Meridian (or precisely at Noon) under 65 Deg. 30 Min. South

South Latitude, and of 91 Deg. 30 Min. of East Longitude from *London*. There is not much probability of any of this Eclipse being visible in the known World, unless perhaps in *Van Diemen's Land*, the utmost Southern Extent of *New Holland*; therefore I shall not trouble either myself or the Reader any further about it in this Place.

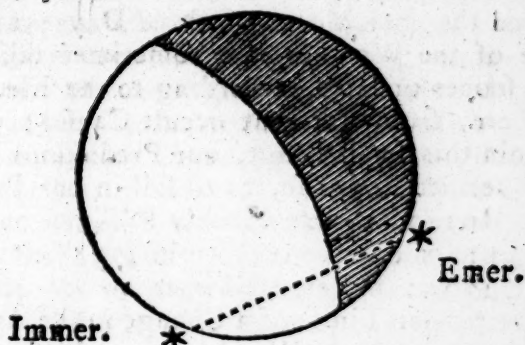

Siderum Congressus.

For the Sake of such curious Persons as delight in contemplating the beautiful Structure and wonderful Harmony of the celestial Bodies, I have taken Pains to exhibit to View, some particular Configurations of them in this Place.

1. On the 11th of *January*, the Two beautiful Planets, *Jupiter* and *Venus*, will be in Conjunction (as seen from the Earth) when the Difference of their Latitudes will be only 54 Min. of a Degree, and may be seen together after Sun-set; for *Venus* will shine very bright every Evening in the West and North-West, all the first Half of this Year; and in *May*, will even shine till nearly 12 at Night.

2. On the 19th of *October*, *Venus* will come to a Conjunction, as seen from the Earth, with the *Georgian Planet*, when the Difference of their Latitudes will be no more than 45 Min. of a Degree. *Venus* is then our Morning Star.

3. On *Friday* the 21st of *October*, there happens a notable Occultation of the Planet *Saturn* by the *Moon*, and visible here if Clouds interpose not: The Immersion of *Saturn* behind the bright Part of the *Moon* will be at 28 Min. past One that Morning, and his Emerision from behind the dark Part of the *Moon*, will be at 14 Min. after 2 in the Morning; the Occultation having continued 46 Minutes. The Appearance of the light and dark Parts of the *Moon*, and Places in the Disk of the Star's Immersion and Emerision will be as in the following Type; and though adapted to *London*, will, without sensible Error, serve the whole Kingdom.

Through a Telescope this Occultation will be a curious Sight, as *Saturn's* amazing Ring will appear at this Time to encircle his Globe, and extend itself on each Side to a considerable Distance from the Planet. The Distance of *Saturn* from the *Sun* is computed to be no less than *Nine Hundred Millions* of Miles, which is above Ten Times farther than the Earth; and therefore his Light and Heat at *Saturn* will be above 90 Times less than it is with us.

One Moment's Cold, like their's, would pierce the Bone,
Freeze the Heart's Blood, and turn us all to Stone.

Strange and amazing must the Difference be
'Twixt this dull Planet and bright Mercury;
Yet Reason says, nor can we doubt at all,
Millions of Beings dwell on either Ball,
With Constitutions fitted for that Spot,
Where Providence, all-wise, has fix'd their Lot.

4. On the 16th of *December*, the Planet *Mars* will come to a Conjunction with *Jupiter*, as seen from the Earth, when *Mars* will be only 13 or 14 Min. more North than *Jupiter*. They may be seen to the West after Sun-set.

Meteorological Observations.

UNDER the Depth of Rain fallen at *London* in 1794, given at the Top of the Right Hand Page of each Month, I have as usual, for the Use of Farmers, Graziers, and other Husbandmen, pointed out certain Days of this Year, 1796, when (from particular Observations of the Planets) there is a great Probability of Rain or Snow, more
or

or less, within the short Space of three Days; and though this Change of the Weather may sometimes take Place a Day or two sooner or later, according to the Electricity of the Atmosphere, from different occult Causes; yet nevertheless, within this small Limit, our Predictions have been wonderfully verified, even so, as to fail in our Part of the Nation, viz. ROYSTON, *Herts*, only 8 Times out of 46 in the Year 1791; six Times out of 47 in 1792; eleven Times out of 53 in 1793; and eight Times out of 46 in 1794. Now these particular Times of a Change in the Atmosphere for *Rain* or *Snow*, with the Weather given in the Columns, make up what I call my general Judgment thereof; and are to be used and classed with the Indications for *Rain*, &c. by a good BAROMETER or *Weather Glass*, which for a Farmer to be without, is like a Sailor going to Sea without his Compass.

A good WEATHER GLASS and this Almanack (but take Care of Counterfeits) are intended as useful Companions, one giving a Check upon the other; so that a Farmer may be at some Certainty when to House his Grain; and the Grazier when to get up his Hay; the Almanack pointing out the near Time, and the Barometer the exact Time. And also note, that in a wet Season, every little sinking of the Quicksilver indicates a Shower; but in a dry Season, the Mercury must sink pretty much before *Rain* may be expected. The Quicksilver always sinks more for Wind and Rain together, than for Rain alone. In stormy Weather the Quicksilver is generally very low, but after the Storm is over, the Mercury rises very fast.

N. B. Good Weather Glasses may always be had of H. ANDREWS, at Royston, *Herts*.

Judicium Astrologicum pro Anno 1796,

Or, *An Astrological Judgment on the Influx and Influences of the Planets, with respect to Mundane Affairs.*

SINCE the Affairs of *Europe* are now under such prodigious Disorder, and, indeed, by a Divine Infatuation of many

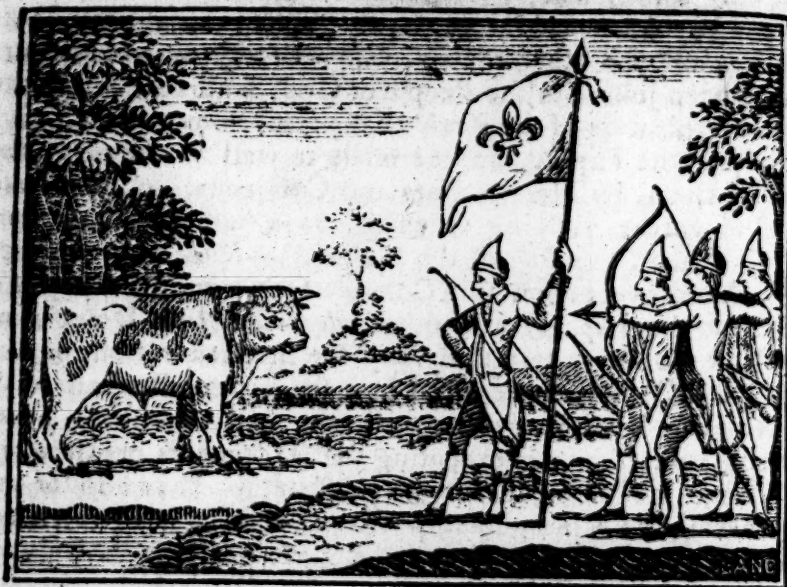

many Princes, and their Ministers, in a most amazing State of Confusion; it may not be improper, as I have done before, again to consult the Sacred Writings, and see what other Predictions they contain relating to these wonderful Times; since there are several of them exceedingly plain, and directly belong to the present Age; and particularly to observe what evident Encouragement they afford to those who are struggling for Liberty, both Civil and Religious, against — and —, so that they will or may be successful. For it is the Opinion of many learned Men, that the Papal State is not only drawing towards its final Period, but even in this very Age it will fall under irretrievable Destruction. In reading over the 13th Chap. of the *Revelations of St. John*, it appears evident to me, on considering the Circumstances of the Times, that the second Beast, mentioned in Verse the 11th, to be no other than *Lewis XIV.* or at least that Tyranny which the Family of the *Capets* (late Kings of France) have exercised, to the great Oppression of the Christian Church, and the Destruction of Mankind. For why might not *Lewis XIV.* or the *Capets*, and their Tyranny, be the Objects of *St. John's* Vision, as well as *Alexander*, *Antiochus*, or any other Tyrant, that of *Daniel's*? For if Pre-eminence in Vice, Oppression, and Murder, entitles to this Distinction, who so abhorrent and vile? Their Tyranny has been the Scourge of *France*, of *Europe*, and the World. It is astonishing what Cruelties *Lewis XIV.* was guilty of, especially towards his Protestant Subjects, when he repealed the Edict of *Nantz*; for in the Year 1685, he tormented, plundered, banished, and murdered, nearly Two Millions of his Protestant Subjects. There is not a Royal Family in *Europe* that has shed, in the Support of *Papery*, half the Blood which the *Capets* have shed: They deluged the Earth with the Blood of the *Waldenses* and *Albigenses*, who inhabited the Southern Parts of *France*, and slew above a Million of them, because they bore Testimony against the Corruptions and Usurpations of *Rome*: They set on Foot, and headed the Executioners of the Massacre of *Bartholomew*, which lasted seven Days, and in which, nearly fifty Thousand Protestants were murdered in *Paris*, and Thousands more in the Provinces; when neither Age nor Sex,

Sex, nor even Women with Child, were spared; for the Butchers had received Orders to slaughter all, even Babies at the Breast, if they belonged to Protestants. The French King himself stood at the Windows of his Palace, endeavouring to shoot those who fled, and crying to their Pursuers, *Kill 'em, Kill 'em*. For this Massacre, public Rejoicings were made at *Rome*, and in other Catholic Countries.

No Country ever had such a Race of Tyrants as *France*, and till within these few Months, there was not an Englishman who did not wish this Tyranny to be extinguished from off the Face of the Earth. The restless and cruel Ambition of the Kings of *France*, and their Court, have occasioned the Slaughter of unnumbered Thousands of our Friends and Countrymen, and contributed towards loading us with a Debt which makes the Nation groan. Not the People of *France*, let us remember, but their Despots, against whose Oppressions they have lately risen up, have been the Authors of all these Evils; and as long as the old System remained, there was no Hope of Remedy. I feel a Persuasion which I cannot overcome, that the French Monarchy was the second Beast which came up out of the Earth: And if it be, the Consequences which are united with it are to the last Degree interesting, both to the Church and to Mankind at large; and could my feeble Voice be heard amidst the Din of War, and the Noise of Party Contentions, I would say, Take Heed, be Wise, refrain from these Men, and let them alone; for if this Counsel, or this Work, be of Men, it will come to Naught; but, if it be of God, ye cannot overthrow it, &c. See *Acts* v. 38, and also *Pf.* xxvi. 10. In the xith of *Rev.* ver. 18, it says, *The Nations were angry, and thy Wrath is come, and the Time of the Dead that they shall be judged*:—the Times when thou wilt avenge the Blood which Tyrants have shed, &c. The Nations will be enraged at this Change of Things, and unite to oppose it, and great Woes are to follow;—Woes which all Descriptions of Men, it is likely, will feel, that they may be brought to Repentance; but which will, in their Issue, fall chiefly upon the Heads of Anti-Christian Oppressors, the Upholders of the *Papacy*.—Whether the Wine Press will be brought into this Country, he

he only knows who is the Lord both of the Harvest and the Vintage. A learned Divine says, "Those carnal Protestants in *England* and other Places, who like the outward Court have been joined to the People of God, shall yet, before the total Expiration of the Beast's Kingdom, be more or less given up to the Papists, and be made to wail to them, if not all of them, by bloody Wars and Conquests, by some base and unworthy yielding to them, as a just Punishment of their carnal Profession of the Gospel."—*Rev. xiv. ver. 20.* The Lord avert from this Country such a Judgment!—To destroy the *Papacy*, and other *Anti-Christian* Despotism, at least, so far as to make Way for the Restoration of the *Jews*, and to prepare Mankind for greater Blessings than have ever been known upon Earth, will take some Years yet to come, for the executing the Judgments predicted in *Isa. xxvi. 20, 21*; *Joel iii. 9, 15*; *Zeph. iii. 8.* as also for the gathering the Vintage and pouring out the Vials, which are to be the means of cleansing the Sanctuary. It is universally agreed by Commentators on the *Revelations*, that the Reign of *Antichrist* is to last 1260 Years, which is twice found in *Chap. xi. Ver. 3.* *My two Witnesses shall prophesy 1260 Days*; and *Chap. xii. Ver. 6.* shall feed the Woman in the Wilderness 1260 Days; for in the Style of the Prophets, a Day is a Year, a Month 30 Years, and a Year 360 Years, there being so many Days in the Jewish Month and Year. Again, *Dan. iv. Ver. 16.* a Time is the same as a Year; Times, two Years; and the dividing of Time, half a Year; therefore 360 and 720 and 180, put together, amount to 1260 prophetic Days or Years. Now if this Period began when the Pope obtained Supremacy, it will expire near or about the Year 1794; for Bishop *Newton* says, that *Justinian* proclaimed the Pope Head of all the Churches about the Year 534; but perhaps it might end sooner, about the Year 1789, when the French Constituent Assembly declared for civil and religious Liberty. *Daniel's* 2300 Years, it is thought, begin 481 Years before Christ, and then must end in 1819, when some other great Event, or Events, will take Place; but of this more in my next. I shall now as usual, present my Readers with a remarkable HIEROGLYPHIC, alluding to these wonderful Times.

HIEROGLYPHICS

HIEROGLYPHICS were much used by the ancient *Egyptians*, to express their Morals, both Divine and Philosophical; and the Art of *Hieroglyphics* is much recommended by the Reverend and learned *Bishop Wilkins*, in his Book on that Subject. I shall omit the deciphering of these Characters, as they relate to a View of Mundane Transactions, but leave them to Time and the Curious to construe.

Observations on the Four Quarters of the Year.

Of the WINTER QUARTER.

THIS Quarter begins on *Monday*, the 21st Day of *December*, 1795, at 15 Min. past 7 at Night, when we have 10 Deg. of *Leo* ascending, and 20 Deg. of *Aries* possess the Mid-heaven; the *Moon* is in 2 Deg. of *Taurus*, departing from an 8 of δ , and Δ of the \odot , after which she applies to a \square Aspect of γ ; and all the Planets (the D and h excepted) are sub Terra, or under the Earth. This is but a sickly Face of the Heavens, and it will be well if the Seeds of some pestilential Distemper be not now sown.

And

And as to Mundane Affairs, it denotes Murmurings amongst the People, Tumults, Riots, Insurrections, and malicious Projects, more particularly in the North and Eastern Parts of *Europe*. The noble Δ Aspect of ♂ and ♂ , at this Time, shews some important Transactions, and I hope it may smile on our National Affairs, promising Increase of Trade, and harmonious Proceedings among our Superiors; and that the late and recent Conteſts and Miſtakes are in a fair Way of Reconciliation; Peace and Tranquillity ſeem to be approaching and laying the Heats and Animofities that have unhappily ſo long diſtracted the Continent of *Europe*, together with its adjacent Iſlands. The *French* Nation proceed in more rational and tranquil Steps than heretofore, and have or are ſettling their Government on the broad and ſound Baſis of civil and religious Liberty, to the no ſmall Mortification of a Popiſh and Tyrannic Party. After ſo many unhappy Events and diſmal Accidents, which have befallen moſt Countries in *Europe*, within theſe few Years paſt, the Heavens at laſt ſeem to promiſe more ſerene and peaceful Days: But the Weathercock of Fortune will not face about to all Countries alike. The two Superiors, 'tis true, are in a Trine Aspect at the Time of this Ingreſs, but then one of them is retrograde: And I don't find in Hiſtory, that ſuch Aspects are always eminent in procuring univerſal Happineſs among Mankind, though I am glad to find, their Influence has very much inclined the European Powers to Peace and Concord. There ſeems a Proſpect of ſome Miſunderſtanding between the King of *Spain* and ſome of the *Auſtrian* Family; and alſo between the King of *Pruſſia* and the *Germans*: But the Aggreſſors, upon more mature Deliberation, and better Counſel, will drop the intended Deſign. I heartily wiſh for a good Underſtanding between us and our Allies, and that no Popiſh Intrigues, &c. may prevail, to make a Breach to the Prejudice of *Great Britain*. The *Turks* are unſettled.

*A Scheme of the Grand Radix of the Year's Revolution, or
the Sun's Ingress into Aries, 1796, or,*

SPRING QUARTER

THE Revolution of the Years of the World are usually accounted to take their Initiation of the Time of the Sun's Ingress into the First Point of *Aries*, which happens this Year, according to my Tables, on *Saturday, March 19*, at 42 Min. past 8 at Night, at which Time 28 Deg. of *Libra* ascend, and 8 Deg. of *Leo* culminate; *Saturn* is in the 8th Deg. of Π , within Orbs of an 8 of *Mars*, in the 17th Deg. of \uparrow ; and the rest are exhibited as you may see in the above Scheme. The * of the \odot to \mathfrak{h} , and of the \odot to Δ , near at Hand, shew that some honest upright Men are willing to endeavour to allay the Animosities of these tumultuous and troublesome Times; but the above mentioned Opposition of *Saturn* and *Mars*, gives Reason to fear that the Affairs of *Europe* may be yet in a disturbed and unsettled Condition. Some Misfortunes and Calamities

ties are threatened to *Spain, Hungary, Turkey, Poland, Russia, &c.* for some Years to come: Nor can we at all expect to be free, for the Planet *Saturn* is in II , *London's* Ascendant, as well as Part of *Flanders, Armenia, Bruges, &c.* Pray God preserve us from Sickness and all other Calamities. Many doubtful Accusations and uncertain Informations against great Persons in the Courts of Princes, and many are tossed sufficiently upon the Waves of Trouble and Vexation. The King of *Prussia* recovers much from his hereditary Enemies, and gains some Advantages by the Accession of New Friends. In *Holland*, their Affairs are rather in a perplexed Situation, for want of Resolution, which adds to their Difficulties. The Affairs of the *Emperor* go on but slowly, yet he will gain more Advantages by Negotiation than by Fighting. The Lustre of the noble House of *Austria* is somewhat eclipsed, but will not suffer a total Obscurity. Now what shall I say to my own native Country! *England, England*, thy empoverished Towns and Cities shall rise and flourish again, though I am sorry to say, we must yet suffer awhile.

Of the SUMMER QUARTER,

WHICH begins this Year on *Monday* the 20th Day of *June*, at 36 Min. past 6 in the Afternoon, when 10 Deg. of \uparrow ascend, and the 10th Degree of \triangle culminates; the *Moon* in the 1st House, departing from an 8 of the \odot , and and next applying to the \ast of II . Here again the Two grand Infortunes, *Saturn* and *Mars*, are within Orbs of their Opposition from II and \uparrow . They will affect the Air with strange and unusual Weather (the Season considered) by sudden Mutations from one extreme to another, sometimes Hot and then Cold, with lucid and fiery Appearances; Wind and intemperate Storms, Thunders both Aerial and Subterranean, which may cause divers Agitations of the Earth in remote Places. I hope *London* and Places near will be preserved from the Trepidation of a *Terræ Motus*. This is like to prove, as the former, a very active and busy Quarter; all or most Countries are deeply immersed in the Troubles of the Times; for this Year will undoubtedly be productive of great Changes, Revolutions, and some unexpected

pected Events; but in general, these Events will be such as arise from Treaties, new Alliances, and Change of Hands, more than Martial Actions in the Field.

Of the AUTUMNAL QUARTER.

THIS Quarter begins on *Thursday* the 22d Day of *September*, at 29 Min. past 8 in the Morning, when 5 Deg. of Ω culminate, and 26 Deg. of Δ are on the Horoscope. The *Moon* in the 8th separating from the \square of Υ , and next applying to the \times of φ , who is in the M. C. and Lady of the Ascendant, where φ is but just risen above the Horizon. From the Position of the Heavens at this Ingress, we live in daily Expectation of a better Understanding of the Intentions and Designs of the most great and active Men of *Europe*, who hitherto have much concealed their Intentions and Resolutions; I say, now there is greater Hope of Unity in Councils and Consultations, both in *England, France, Germany*, and other States and Kingdoms adjacent. With a Heart agitated and overflowing with anxious Concern, I pray that the angry Clouds, which have been gathering around our long favoured Country, may spend their Stores of Vengeance only on the Heads of inveterate Oppressors.

Let us all, our Concerns to Heav'n commend;
For our KING's Safety let us ever pray;
Our sinful Lives let's all strive to amend:
Use Christian Charity; for that's the Way,
In smoothest Steps, to make us all unite,
Peace, and all other Blessings to invite.
